One-Way Door & Window Vinyl Graphics

One way vinyl is a perforated self adhesive vinyl film used for the decoration of external windows. It has many small holes which allows you to see through it in certain circumstances. When your outside in the light the print almost looks like solid printed vinyl. When you're inside looking out the glass appears a little darker but you can see straight out into the daylight. Just like magic ! One way vinyl is an ideal way to transform glazed doors and windows into vibrant, colourful branded focal points that will leave a lasting impression on pupils, staff or visitors alike.

The colourful printed graphics reflect natural light and prevents a view through the glass into the building. From the inside looking out a finely perforated black mesh finish allows a high degree of see-through ability. Our price guide is based on a printed square metre rate To give you an indication of prices we have shown some prices for popular door and window sizes above. The application of one-way vinyl film can help to reduce the heat and glare from the sun leaving the inside of the windows looking like a slightly darker tint has been applied to the glass.

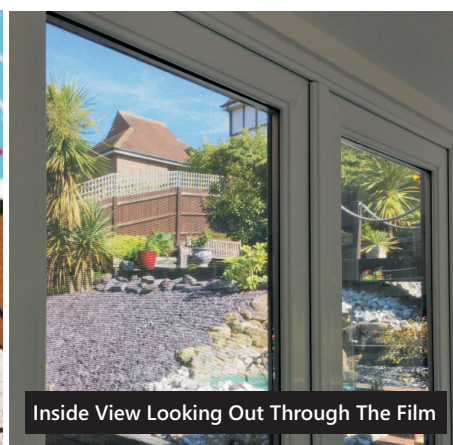

Price Guide Only - Other Sizes Available

660 x 1775mm Glass Door Panel	£70.26
